Congratulations to

## Sergey Kurepin

for successfully completing the training course

### C# in AEC Fundamentals

This comprehensive training served not only as an exploration into the foundational and advanced concepts of applying C# within the Architecture, Engineering, and Construction sectors but also established a robust groundwork for delving into more advanced programming aspects. The participant honed skills in data management, geometric object manipulation, and practical applications, fortifying a capability to navigate through complex AEC-related challenges with efficacy and expertise. This achievement marks a significant milestone in the journey toward continual professional development and mastery in computational solutions within the AEC field.
