PROGRAMMING IN AEC

CERTIFICATE
OF COMPLETION

Congratulations to

Jonathan Palacios

for successfully completing the training course

Python in AEC Fundamentals

This course has provided participants with a thorough foundation in Python, from essential programming principles to specialized applications in the Architecture, Engineering, and Construction sectors. The curriculum spanned understanding basic data types and variables, managing and manipulating geometrical entities in Grasshopper and Rhino, and implementing control structures and functions, paving the way for advanced exploration in AEC programming with Python.
